WELCOME TO SOONER SHORTHORN FARM

**KUSEL BROS.
Shorthorn Dispersion
OCTOBER 11
Ft. Cobb, Oklahoma
125 Head Selling**

**May Lancaster 4th and Sooner Queen, two cows selling
in this quality-filled sale.**

Featuring the get and service of Kelburn Great Event, Melbourne Masterpiece, Panther Creek John, Scotsdale Audacious, Allen's Lancaster, Clearview Navigator, Bapton Constructor, Braeside Roan Robin, Scotsdale Juggernaut, Killearn Welfare 43rd, Kair Victory, Calrossie Welfare, Scotsdale Bombardier, Colomeadow Sting Ray, Glamis Benefactor, Scotsdale Laurencekirk, Edellyn Bravado, Clear Creek Gambler, Chapelton Coastguard, Westdrums Oliver, Melbourne Clarion.

INFORMATION

TIME

Saturday, October 11. Sale starts at 12:30 p.m. C.D.T.

LUNCH

Available on grounds.

LOCATION

½ mile east and 1 mile north of the north edge of Fort Cobb at Sooner Farm.

HEALTH

All cattle will be tested within 30 days of sale date and buyers will be furnished with complete health charts on all animals selling. Brucellosis calfood vaccination for heifers has been practiced since the inception of the herd.

TERMS

Cash. All cattle are to be paid for by the purchaser during or immediately following the sale. Settlement must be made before animals are loaded out.

LIABILITY

Each animal will be at the purchaser's risk immediately after the animal is bid off and the auctioneer announcing the animal sold. This shall constitute a contract between buyer and the seller.

All cattle will be fed and cared for, free of charge, for a reasonable time, until they can be removed by the buyer or his agent, but at the buyer's risk.

Every precaution will be taken for the safety and comfort of those attending the sale, but owner and sale manager assume no liability, legal or otherwise, for any accidents that might occur.

INSURANCE

Livestock mortality insurance can be obtained through Harding & Harding Livestock Insurance at the sale. See clerk for details.

GUARANTEE

Since this is a dispersion, the cattle sell as is and the Standard Guarantee of the American Shorthorn Ass'n does not apply. However, the guarantees as stated in the footnotes, or announced from the auction block, will be in effect. Any statement from the block takes precedence over printed material. No animal will knowingly be sold that is not considered a sound breeding animal.

REGISTRATION CERTIFICATE

A certificate of registry, properly transferred, will be furnished each buyer without cost to him. Application for registry will be furnished with each unborn calf sold in dam.

PREGNANCY EXAMINATIONS

Some cows have been pregnancy tested prior to the catalog deadline. This information is printed in the catalog. The remainder of the cow herd will be pregnancy examined prior to the sale and announcements made from the auction block.

MOTELS

Valley Inn Motel, Fort Cobb.
Black Beaver Motel, Anadarko.

AUCTIONEER

C. K. "Sonny" Booth.

FIELDMEN

Gene McDonald, The Shorthorn World, 16 South Locust St., Aurora, Illinois.

Ken Holloway, American Shorthorn Ass'n, 122 N. Lafayette, Frederick, Oklahoma.

Dwayne Dietz, The Drovers Journal, One Gateway Center, Kansas City, Kansas.

HONORARY RINGMEN

Wray Finney, President, Oklahoma Cattlemen's Ass'n.

Vic Taylor, President, Oklahoma Shorthorn Ass'n.

Jack Deason, Director, American Shorthorn Ass'n.

SALE MANAGER

Bill Stunkel, 1228 N. Nye Ave., Fremont, Nebraska.

MAIL BIDS

Mail bids to the sale manager, owners, auctioneer or any of the ringmen listed. We will be pleased to represent you if you are unable to attend.

Why Are We Selling?

JIM KUSEL

JOHN KUSEL

We have regretfully made the decision to disperse our Shorthorns. It has become almost impossible to find competent labor to work with registered cattle. John will finish his M.S. degree next spring, then immediately begin two years active duty in the U.S. Army. Jim will be in charge of the entire farming operation, and, due to the shortage of labor in this area, he will be tied down with those obligations.

We hate to give up the Shorthorn business because we like it so well. But we have no other choice. We hope to go back to raising Shorthorns in a few years when we can have the time and the help to properly manage a herd of this size and quality.

WHY DID WE CHOOSE SHORTHORNS ORIGINALLY?

We chose Shorthorn steers and heifers as our first F.F.A. projects ten years ago. We felt . . . and it proved true . . . Shorthorns were beginning a "revival" and had the greatest potential for the future. We are indebted to several dedicated Oklahoma breeders who gave us counseling and who helped us get started . . . the late W. P. Wamsley, Oscar and Jack Deason, Hubert Blasingame, Cliff Milligan, Dale Repp, Doug Coffee, Bob Collier and Clarence Tribble.

WHAT ARE OUR GOALS?

We have always wanted to "produce the best". Since we began performance testing in 1964 we have consistently tried to produce calves that exceeded P.R.I. weaning weights and had yearling bull weights in excess of 1,000 lbs. without sacrificing muscling. We wanted to maintain the quality of our cattle while developing optimum growth factors.

HAVE WE ACCOMPLISHED THESE GOALS?

The 205-day weaning weight average was 507 pounds for the 1967 and 1968 calf crops. This is well in excess of P.R.I. Standards. Our bulls at performance test stations in Oklahoma have averaged 1,002 lbs. at 365 days of age on growing rations. The cow herd has been culled since 1964 on their ability to produce calves that exceeded P.R.I. weaning weight and grade standards. The two current herd sires were selected for their size, scale and muscling. Melbourne Masterpiece weighed 1,090 lbs. at 365 days and Allen's Lancaster weighed 1,700 lbs. at 24 months.

JOHN and JIM KUSEL

A Sale to Attend!

It has been truly stated that "the best buying opportunities come in dispersion sales." This statement was never more true than in the case of the Kusel Bros. Dispersion.

A wealth of good breeding is being dispersed. More important, these cattle are backed by P.R.I. records. We are not suggesting that every animal to sell is a world champion. We are suggesting that you will be very pleased with the overall quality. John and Jim Kusel have done an amazing job of herd improvement in a short time. In fact, I think you will be as pleasantly surprised as I was when I saw this herd in August.

I am especially enthused over the service and calves by Melbourne Masterpiece and Scotsdale Audacious. If I were to prepare a list of sires that I think will write a BIG chapter in breed improvement, these two would be right at the top of my list.

The enthusiasm that John and Jim have displayed for Shorthorns is deserving of your support sale day. Let's give them a good sale. We want these two young men back in our Shorthorn ranks when school and military obligations are fulfilled.

See you October 11th.

BILL STUNKEL
Sale Manager

About the Kusel Bros. Herd

This herd was begun with carefully selected foundation females from the Dale Repp, O. H. Deason and Son, and W. P. Wamsley herds in the Fort Cobb area. More females with size, milking ability and modern type were purchased from Doug Coffee (6 daughters of Clear Creek Gambler averaging 1,265 lbs.) and in the W. P. Wamsley Dispersion (7 daughters and five granddaughters of Kair Victory). Several top cows were purchased in the J. A. Carter Dispersion and in the first KC Farms Sale. Private treaty purchases from the Oklahoma Land and Cattle Co. added some of the best Claude Gallinger cows from the famous Killearn herd.

The bulls used in this herd have been selected for size, soundness, muscling and the ability to transmit these characteristics to their sons and daughters. Kelburn Great Event is universally known for the ton-type bulls with great show records that he has sired. Melbourne Masterpiece was purchased to continue the Kusel Bros. performance testing program because of his length, outstanding yearling weight, size and scale.

Cows carrying the service of Scotsdale Audacious were added to the herd to infuse the prepotent Scotsdale blood into the breeding program. Allen's Lancaster, a Canadian-bred bull weighing 1,700 lbs. at 24 months, was selected for his size, gainability and muscling.

Since the beginning of the performance testing program in 1964, it has been the intent of Kusel Bros. to breed fast-growing Shorthorns without sacrificing quality. Weaning weights have increased annually during this period and the herd average for all calves for the past two years has been 507 lbs. at 205 days.

Here is how Kelburn Great Event looked on pasture at KC two years ago. Since this great sire is now dead, this sale will be one of the last opportunities to buy his get.

KELBURN GREAT EVENT — The list of champions and top sellers sired by this bull would fill a volume in itself. Suffice it to say that all Great Event calves have wonderful scale and bone. His daughters are females of exceptional strength and great udders.

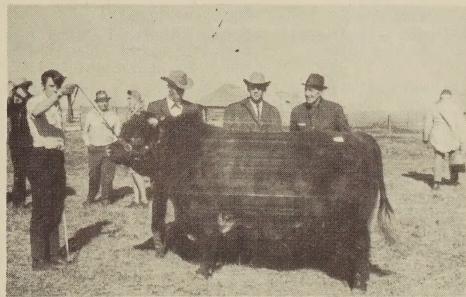

Remitall Captain Jim, 1966 Canadian International Bull Sale topper, is a son of Great Event and in use at Melbourne Farms, Big Rock, Ill.

Remitall Gold Emblem, 1968 Canadian International Bull Sale champion and top-seller at \$8,100. He is by Great Event and in use at Melbourne Farms.

Remitall Banner, 1967 Canadian International champion and top-seller at \$8,000. Owned by Colomedow Farms, Byers, Colo. He is also a Great Event son.

Remitall Super Event by Kelburn Great Event. He topped the 1968 Remitall Sale at \$8,600 going to McIver Bros., Farwell, Minn.

SCOTSDALE AUDACIOUS

		Gainforth Marshal Roan, Bluemont Farms
		50th Duchess of Gloster 14th Red, Taana Farms

CLEARVIEW BOMBARDIER — His sire, Scotsdale Bombardier, was grand champion at the International in 1949. He was a large, heavy quartered bull. In a poll of 10 leading breeders asked to rank bulls on different traits, Scotsdale Bombardier was ranked second on the list for his rear quarter behind the 1941 International champion Gainforth Marshall. So Clearview Bombardier came by his great quarters naturally. Gary Longacre of Oklahoma Land and Cattle Co. considered Clearview Bombardier the meatiest Shorthorn bull he had seen. He was never fat in his entire life and still weighed over 2,000 lbs. when slaughtered at 11 years of age.

C. A. Mallett Cattle Co., Miles City, Mont., writes: "Our cow herd contains 600 Angus and crossbred cows. Our entire sire battery is now Shorthorn bulls. We purchased Shorthorn bulls to get a better calving percentage, a heavier calf, and a better feeding animal. Shorthorn crossbreds wean about 10 per cent heavier than straightbreds of other breeds. I think the Shorthorn cross will eliminate a lot of the cancer eye and womb troubles of the Hereford."

ALLEN'S LANCASTER — A big-framed, meaty bull. He was purchased privately from Allendale Farms, Ontario, Canada, in the winter of 1967. He was selected because of his massive size and his heavy muscling. Lancaster weighed 1,700 lbs. at 24 months. He was shown five times in Canada. He was grand champion twice and second in class to the grand champion three times against some of Canada's toughest competition, including Scottdale. Both his sire, Louada Copyright, and his grandsire, Bapton Constructor, were ton bulls with good conformation. The dam of Louada Copyright is a daughter of the immortal Blood Royal 33rd,

ALLEN'S LANCASTER

which makes her a maternal sister to the \$30,000 Louada Bonaparte.

Lancaster's dam is a good female bred by Harold Frey, Oxbow, Sask. She is a granddaughter of Rothney Graduate and Killearn Max Barnone.

Lancaster is the sire of several calves selling at the side of their dams. We believe you will like these big, growthy calves that have plenty of bone and muscle.

Lancaster was permanently injured last year and will not be sold.

A "GROWTH" STOCK

Shorthorn and Polled Shorthorn cows are a growth stock: In financing parlance this means a sound investment that is assured of increasing in value.

The future of all beef cattle looks bright. The growing population in America and a growing per capita beef consumption makes investment in cow-calf programs mighty attractive.

The Shorthorn-Polled Shorthorn future looks especially bright. That is because the breed has more to offer the beef world than any other breed.

There are breeds more highly glamourized . . . there are breeds with more inflated values but no breed is more universally recognized for its improvement ability than the Red, White and Roan. Nearly every large, exotic breed in the world owes much of its parentage to Shorthorns. If you really think about that fact alone, you should have a greater appreciation for Shorthorns.

No breed has more genetic purity than Shorthorns. The breed has no problem with dwarfism, cancer eye, prolapses, sunburned udders. No beef breed is so enriched with milking ability, with docility, with gaining ability.

There has been talk about Shorthorn lack of carcass quality. However, at the 1969 New York and Indiana State Fairs, Shorthorn carcasses were winners on the rail. In a Penn State University taste test, women scored Shorthorns the highest for tenderness, flavor and juiciness followed, in order, by Polled Herefords, Angus, crossbreds, Charolais and Holsteins.

We could go on and on about Shorthorn superiority and their higher profit potential. If you own Shorthorns, you know their dependable productive ability. If you don't own Shorthorns, it is high time you did. The females offered in this sale can do much to cement your faith in our breed.

MELBOURNE MASTERPIECE — Two-thirds interest and full possession sells: Jack Klopfer, Fountain City, Ind., paid \$500 for a third interest in this bull at the September 6th Russel Edwards & Family sale in Indiana. He has the privilege of drawing semen at his expense.

Masterpiece was second top-selling bull in the 1965 Melbourne Sale at \$5,800 for a two-thirds interest following a great show career. He produced brilliantly in the George Miller herd in Alabama. He is backed by one of the breed's most faultless pedigrees. His sire, Calrossie Diamond, is known and respected as one of the great breeding bulls in history. Masterpiece has an excellent head, breedly, masculine, most acceptable appearance and is burly and rugged throughout. He is straight and correct in his lines and skeletal make-up. Exceptionally smooth and has a thin, pliable hide denoting his extreme high quality. His great length, size, scale and bone, coupled with the heavy muscling throughout, puts him in the class of a modern beef bull.

His get are outstanding. He has proven his prepotency and is one of the great breeding bulls you will find. The first son of Masterpiece that sold in the Miller Dispersion brought \$900 as a calf. The first son of Masterpiece to sell in the B. C. Barnes Dispersion brought \$950 as a calf. Masterpiece sired Melbourne Nelson that sold for \$1,000 in the 1968 Melbourne Sale.

This bull sells in breeding condition as he has serviced more than 130 cows naturally in the past 18 months.

Melbourne Missie, 1964 International grand champion female, is a full sister to Melbourne Masterpiece. Their dam is the highest classifying cow in the great Melbourne herd.

WHY BUY SHORTHORNS?

- *Shorthorn bull are active, sure breeders.
- *They put more growth into their calf crops.
- *Shorthorns are historically known for their faster gaining and finishing ability. The demand for Shorthorn and Shorthorn crossbred feeders far exceeds existing supplies. Consequently, they sell for a premium.
- *Shorthorn bulls put more milking ability into their daughters . . . this means heavier weaning weights.
- *Shorthorn docility is world famous making them ideal projects for youngsters.
- *Shorthorns eliminate the cancer eye, sunburned and snowburned udder problems.
- *Shorthorns are known as "THE GREAT IMPROVERS". Shorthorn crosses have been proven in test after test to be superior to other crossbreds in milking ability, rate of gain and feed efficiency.
- *Ask yourself why so many commercial herds are now crossbreeding with Shorthorns? IT'S BECAUSE THEY ARE BEST IN EVERY WEIGH.

SOONER GREAT EVENT

Sells as Lot 3B and could be the best individual in this entire sale. He is as modern as he looks in this amateur snapshot.

REMITALL BELEVEDERE

A son of Kelburn Great Event that is doing a great job in the Cliff Milligan herd, Hinton, Okla.

Lot 3, A

Female

G V SILVER MYSIE 3153-268

Tattoo RE H493

Red, calved January 2, 1963. Bred by W. P. Wamsley, Fort Cobb, Oklahoma; owned by John C. Kusel, Fort Cobb, Okla.

GV SILVER MYSIE — This impressive, young cow is one of our best producers. She is a granddaughter of the famous Kair Victory, possibly the best bull ever used in Oklahoma. Her dam weighed 1,400 lbs. in pasture condition. A maternal brother gained 3.4 lbs. per day on test and weighed 1,060 lbs. at one year of age. She has a roan bull calf prospect, Sooner Great Event, that we have been offered some big money to sell. He may be the best animal in this dispersion. He is lengthy, leggy, modern and heavy muscled. He could be one of the best herd sire prospects that Kelburn Great Event has ever sired.

A CHALLENGE

It has been predicted that by 1980 the U.S. population will be about 230,000,000 people consuming an average of 120 pounds of beef per person. This will require over 27 billion pounds of beef which is about 42 per cent more than was consumed in the U.S. in 1966.

Our historical dependence on western sources for feeder cattle is changing. New feedlot operations in range areas are now depleting some of the Corn Belt's dependable sources for calves. This means that farmers all over the country are going to have to produce more of the feeder cattle required. This March one Iowa auction market was sending two semi-loads of calves each week to Colorado for feeding . . . a sign of things to come.

QUEEN CLARA 2nd OF KC

By Kelburn Great Event this heifer was grand champion at the 1968 American Royal.

Then, too, 70 per cent of the material used for producing beef . . . corn stalks, wheat pasture, beet tops, etc. . . . have no higher "use-value" than beef production.

With land values increasing in range areas, the land investment to carry a cow-calf is now cheaper in many sections of the Southwest than it is in more westerly range areas.

This all means a great opportunity for the cow owner in Oklahoma, Kansas and Texas. The market for beef is growing. We need more farmers producing more calves on their marginal acres. Economists predict it will be a paying proposition.

You can buy "extra" profit cows in this sale.

SECRET LILLY OF KC — The 1966 International junior champion female. She also won her class at the American Royal and made reserve junior champion to her stall mate, Miss Ramsden of KC. The pair were unbeaten at the American Royal as well as the Illinois, Missouri and Kansas state fairs. Secret Lilly also headed KC's undefeated junior get-of-sire of 1966. Guaranteed bred to **MELBOURNE MASTERPIECE** and should calve in late December.

GLAMIS BENEFACTOR
Sire of **Lot 19**. Benefactor was the undefeated supreme champion of Great Britain in 1962 and is the only bull ever to win both the Perth and Royal Highland supreme championship in one year.

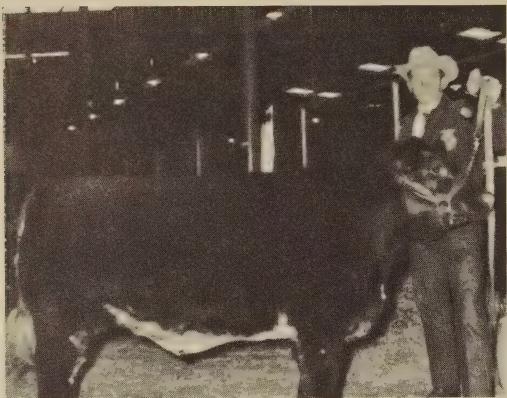

Miss Ramsden of KC and Secret Lilly of KC, Lot 19, were undefeated pair of females at the 1966 Illinois, Kansas, Missouri and Mid-America state fairs as well as the American Royal. They placed second at the International.

Princess Judy of Sooner, Lot 20 in this sale. A sale attraction.

A maternal brother of Lot 20 that was grand champion steer at several district and county shows.

WESTDRUMS OLIVER, sire of Lot 21. Oliver stood third in class at the 1961 International and has sired a lot of impressive daughters for Doug Coffee.

SSF GAMBLER'S QUEEN FLORA — A good young cow that is a good foundation female. She holds I.P.R. Certificate No. 23191 in Performance Registry International. She has an April 2nd roan bull calf by **ALLEN'S LANCASTER** and is rebred to **MELBOURNE MASTERPIECE**. Her sire is the 1,900 lb. imported Westdrums Oliver that stood third in his class at the International.

Pictured at right is Colomedow Sting Ray, the first Shorthorn bull to be certified by Performance Registry International as a Certified Meat Sire. This 1964 Western Shorthorn Ass'n. record seller at \$5,600 sold to Dale Petty, Eldora, Iowa. With only 13 of his calves to select from, they surpassed P.R.I. standards as to rib eye, minimum fat thickness and carcass weight per day of age.

Think "Cents-Ably" About Size

This good cow is Secret Lilly of KC, selling in this sale. Here is a highly valuable matron.

Anyone who has attended a major show this summer knows full well that judges are picking them bigger, longer and trimmer. This is true in all breeds. This trend has confused a lot of breeders and buyers.

Every cattleman knows full well that often his best and most profitable cow is his hardest looker and maybe even the smallest. So size doesn't necessarily measure a cow's profit potential.

A test at Texas A & M University, McGregor, Texas, is underway on cow size. A. Melton, animal husbandman in charge of the test, says preliminary results show no positive relationship between size of the cow and the gain of the calf. He said milk yield of the dam seems to have much more effect on performance of the calf than size of the cow.

Surprisingly, and contrary to some other reports, smaller cows often gave as much, or more milk than large cows.

In the test, cows were divided into groups according to size. In one group, Melton found the smaller cows raised calves weaning an average of 29 pounds more than those from the larger cows . . . and on ten pounds less feed.

In another group, the small cows raised calves weaning 72 pounds more than the larger cows . . . and on 237 pounds less feed.

We don't cite these figures as a condemnation of large cows. On the contrary, we encourage the trend to larger cattle as long as they remain productive, efficient and profitable.

Size is not always the most "cents-able". There are many other factors influencing the profit picture. We feel that the purchase of good, average size

cows of proven bloodlines ARE A SOUND INVESTMENT. We feel the retention of these cows in the breeding herd IS SOUND. We also feel that breeders need to be buying bulls that will correct herd faults. If you need more thickness, buy a bull with this trait . . . if you need more milking qualities, buy a bull from a dam known for superior milk production.

Not too long ago, "experts" stampeded the cattle industry to a type that made little sense. Just as the short-legged, fancy-headed, short-coupled cattle were once heralded as the right kind, just so the opposite now. The new type makes more sense but even it might not be the entire answer 10 years from now.

We know of one Nebraska Sandhills rancher with a quality whiteface herd that sold them to replace with a new, big breed. He woke up to discover that he could only maintain about two-thirds as many of these big cows on the same acreage. Where his herd had been culled for many years for calving percentage, he now came up with the lowest percentage calf drop in his career. Then to top it all off, when the calves were sold they didn't weigh nearly enough to compensate for the lower selling price per pound or the fewer calves available for sale. THIS MAN HAS THE BIGGEST COWS IN HIS AREA AND IS GOING BROKE FOR THE PRIVILEGE.

What is the answer? We advise every one to get on a performance testing program and prove to himself what are the most profitable sized cattle for his operation. Make sure the change you make is for the best. **BASE YOUR CHANGE ON SOUND STATISTICS NOT A LOT OF LOOSE THEORIES AND TALK.**
